Main Photo and tag line are updated under: Site Settings/Site Identity In Elementor

Recaptcha had to re-registered on google and updated on the new Word Press Site.

Elementor had to be re-installed, the publish button was not available. The work around was to use the regular editor page to force publishing changes.

Gravity registration form did not create a user. But settings looked OK.

The screenshot shows the Gravity Forms 'User Registration' settings page. At the top, there are tabs for 'Registration Form', 'Edit', 'Settings', and 'Entries'. The 'Settings' tab is active. On the left is a sidebar menu with various settings categories, with 'User Registration' selected at the bottom. The main content area is divided into two sections: 'Feed Settings' and 'User Settings'. In 'Feed Settings', the 'Name (Required)' field contains 'User Registration Feed 1'. The 'Action (Required)' section has two options: 'Create User' (which is selected with a green checkmark) and 'Update User'. In 'User Settings', the 'Username (Required)' field is empty, and the 'First Name' field is also empty. There are help icons (?) next to the required field labels.

Registration Form	Edit	Settings	Entries
Form Settings - Form Settings - Confirmations - Notifications - Personal Data - PayPal - PayPal Checkout - PayPal Payments Pro - PDF - Pending Activations - Popup Maker - reCAPTCHA User Registration			
Feed Settings Name (Required) ? User Registration Feed 1 Action (Required) ?  Create User  Update User			
User Settings Username (Required) ? Username First Name ?
