Setting up Twinkle and asterisk on the same machine

If you want to use Twinkle on the same machine as your asterisk instance, you'll need to change the SIP port that Twinkle uses. Assuming asterisk is up and running, you'll get this error message when you start Twinkle: **Failed to create a UDP socket (SIP) on port 5060 Address already in use** Hit "System Settings" on this

screen:

And then choose network:

local asterisk instance.

Change the SIP port to 5061 and it'll start up and connect to your
