

Assessment to Enrollment Update

Find the values that need to update the enrollment record

```
SELECT

assessment_results.students_id,

assessment_codes.id,

# grouping by subject ID, so these find the average for all assessment codes with
# same subject

avg(level_equivalent) as Final_LevelEq_enrollment ,

avg(dapdtterm) as APRate_enrollment,

avg(dapterm) as DAPDT_enrollment,

subjects.name,

subjects.name, // why twice?

student_terms.name,

assessment_codes.subjects_id

FROM assessment_results

left join assessment_codes on assessment_results.assement_codes_id=
assessment_codes.id

left join subjects on assessment_codes.subjects_id=subjects.id

left join student_terms on student_terms.id=assessment_results.student_term_id
```

'\$s.' Injects Assessment code ID, student ID and Term ID (variables passed to this subroutine)

finds the set of assessment results for a given student, given term, and at final stage of the term.

where assessment_results.students_id=" . \$sID . "

and assessment_results.student_term_id=" . \$sTermId . "

and assessment_results.stage=266 // term final assessments (stage=266)

find the set of final assessment results with matching subjects, as defined in the assessment code.

and subjects.id=(

 Select subjects_id //filtering results where the id of the subject matches the result of the subquery

 from assessment_codes //looks up the subjects_id from the assessment_codes table

 where id=" . \$sCodeId . " and exclude_results!=1 // sub

 limit 1

)

group by assessment_codes.subjects_id, assessment_results.student_term_id;

Assessment Result Sample Data

Raw Score	Student	Terms	Stage	Assessment Code	Assessmentcode.Subject	Assessmentcode.Exclude	Improvement
540	183	Spring 2025 183	final	IXL.OP	Math	YES	<i>calculated relative to other assessment records</i>
620	183	Spring 2025 183	final	IXL.MAT	Math	YES	
530	183	Spring 2025 183	final	IXL.GRAM	English	YES	
490	183	Spring 2025 183	final	IXL.VOCAB	English	NO
