

10/20/2023 Next Cloud Directory not available

12:36 PM NextCloud Problem returned

dh - f command not running in webmin command shell

At first looked fine, said no problem, then when IONOS guy said server is "stuck."

Access VNC console showed a weird message, he agreed to put in a ticket since it looked like a server issue.

Victoria could not see anything on the VNC console - all black.

Revision #2
